

Amarr[®]

Solid steel construction is the basis for the Model 1000.

Two tough steel skins surround 2 inches of CFC-free polystyrene insulation. In addition, a thermal break creates a barrier to keep heat and cold from transferring through the door. Each Model 1000 features heavy-duty hardware for smooth operation.

To help resist dents, the outer steel skin is made of strong 24-gauge steel and the interior skin is made of 27-gauge steel.

The interior and exterior faces of the door feature stucco embossing and the exterior has shallow ribs. The Model 1000 is available pre-painted in Commercial White.
