

Heavy Industrial-Duty Gear-Reduced Hoist Operator

- Removable forged electrical box cover
- Easy field conversion in seconds for left- or right-handed drive and hand
- 110V, 200/230V, 400V, 575V, 24V MCC Class 2 Circuit with 40VA transformer

Includes the Logic 3.0 board and the exclusive Maintenance Alert System™

Logic 3.0 Technology

Elite Series™ Commercial Door Operators are engineered, manufactured and tested to provide reliable service to meet the toughest commercial applications.

Added Value

- Built-in 2-wireless, 32MHz radio receiver accepts up to 21 Security® or unlimited 227-switch remote controls.
- All LiftMaster® 3-button remotes can be programmed for open/close/stop operation.
- Maintenance Alert System™ lets you establish a routine maintenance schedule based on the number of cycles and/or operator duty. Includes self-diagnostic system for easy troubleshooting.
- Time-to-close may be set to close in 5-second or 3-minute increments.
- Thermal motor overload can be reset from the 3-button control station.
- Built-in programmable end-stop.
- Built-in programmable magnet run timer.

Reliability

- Switchless motor eliminates dust, dirt, switch and motor malfunctions of single-phase operators.
- All high-voltage connections have been removed from the board for safer installation and improved reliability.
- 1-1/2 second delay on-reverse helps prevent door and operator wear.

Programming Simplicity

- Selector dial replaces DIP switches for selecting wiring type and programming, including factory and non-factory wiring.
- Diagnostic LED's speed installation and troubleshooting.
- Motor direction jumper lets you change motor direction by simply moving a jumper.
