Arm-R-Lite Aluminarc Model

U.S. Patent No. D498303,

Electra® Model

Car Care Center, Teterboro, N.J.

Titan® Model

BJ's Wholesale Club, N.J.

PASS DOOR

CONSTRUCTION METHOD

Lengths of 6063-T5 alloy hollow aluminum extrusions are cut to size for rails and stiles. Stiles are then contour-milled and accurately joined to the rails by concealed welding to produce flush hairline joints and a framework unequalled in strength and durability.

- Our four-sided or tubular extrusions exceed the three-sided or open extrusions of competitors.
- Arm-R-Lite's superior, all-welded construction outperforms the thru-bolted models year after year.

WIND LOAD

All doors constructed to meet or exceed standards established by DASMA (Door & Access Systems Manufacturers Association). Special wind loading available for high-wind applications.

These options and features are available on all Arm-R-Lite Aluminum & Glass Roll-up Doors

- 20 year welded aluminum section warranty
- Pedestrian pass doors (see left)
- Designer glass, panels, polycarbonates, louvers, screens, metal fabric, perforated metal, etc.
- Finishes in thousands of colors
 - Kynars®, Duranars® (20 year warranty)
 - Powder Coat (1 year warranty)
 - Champagne, dark, medium, light and black anodized finishes available
 - Faux Finishes

Patent pending.
