ESTATE SERIES Designed to exceed expectations

Providing the highest level of safety, security and convenience for specific applications and for customers that want the very best.

3/4 HP BELT DRIVE - 3585 50% more power and quiet as a whisper

The finest choice for homes with a room above the garage. The model 3585 features our most powerful motor along with the quietest drive system available. It provides strong lifting power and improved performance in all temperature conditions. Its revolutionary belt drive system is designed to eliminate noisy metal-to-metal contact for ultra-quiet operation. Plus, this system includes our patented Motion Vibration Isolation System (MVIS®) for smooth-running performance and reliability year after year.

The in-vehicle universal remote control.
See your automobile dealer for availability.

The 3585 Difference...

- Ultra-quiet belt drive system
- Fastest, most powerful motor
- Improved performance in cold weather
- Premium accessory package
- Lifetime motor and belt warranty

For Safety, Security and Convenience

Brighter Light...Hands-Free

Motion-detecting control panel turns on lights automatically. 200 watts of light with 1 1/2 to 4 1/2 minute light delay. Hinged light covers make bulb changes easy.

Super-Quiet Motor Vibration Isolation System (MVIS®)

Provides smooth-running, trouble-free operation year after year.

Rolling Code Technology

With rolling code technology, you are assured of a new code with every use. Every time you push the button, the code automatically rolls over to any one of over 100-billion new codes, never to be repeated. Operates up to 3 garage doors.

Enhanced Radio Technology™ (ERT™)

315MHz frequency provides superior protection from outside signal interference.

Safety Features

Equipped with PosiLock®

Once your garage door goes down, it's securely locked with PosiLock®, a patented Chamberlain® feature.

The Protector System®

Projects an invisible light beam across garage door opening; if interrupted while the door is closing the opener reverses before making contact. If beam is obstructed, door will not close.

Installation Features

Exclusive! The Smart Garage Door Opener®

Lets you electronically program security codes from the motion-detecting control panel or the powerhead.

Quick-Connect™ Terminals

Push-in wiring for quicker installation.

6-Foot Power Cord

Makes connecting to a power source easier than ever. Ideal for vaulted ceilings.

Enclosed Gear Case

Provides continuous lubrication for longer life and smoother operation.

Optional Accessories

Mini 3-Button Remote Control with Security+®

Operates up to 3 garage doors. Turns garage door opener lights on and off. Carry on keychain or in pocket or purse.

Wireless Keyless Entry with Security+®

No need for a key or remote control. Gives friends, relatives and service people limited access to the home. Illuminated for nighttime use.

Garage Door Monitor

Lets you know whether the garage door is open or closed from any room in the house. A flashing red light shows the door is open; a glowing green light indicates the door is closed.

Laser Garage Parking Assist

The high-tech solution that helps you park perfectly in your garage! As you pull into your garage the laser is activated and projected onto your dashboard, making it easy to park in the same spot every time.
