

**MODEL 524**

Model 524-Standard and Models 524V/524S-Insulated

These high quality, heavy-duty 24-gauge doors are designed for most commercial and industrial applications—providing long service under demanding applications.

Rust-proof

Doors are pre-treated inside and out to inhibit rust. The ribbed polyurethane is painted with primer and given a tough, multi-layered polyurethane top coat to provide the most rust resistance and stain protection. For your warranty application, see through.

Ribbed Panel Design

FEATURES

- 2" thick vertical steel-filled door
- Full 24-gauge, heavy-duty steel doors are hot-dipped galvanized, coated inside and out with an epoxy primer and finished with a baked-on white or brown polyester top coat for maintenance-free performance
- Available non-insulated or insulated with environmentally safe expanded polystyrene nested to the section
