model 9800

**Wayne
Dalton**

see

This could be the most beautiful wood garage door
you've ever seen. Except it's not wood.

Model 9800 has been magnificently engineered by Wayne-Dalton. With an artfully molded fiberglass surface concealing durable steel construction. The high-definition graining will astound your eye.

On the cover, the 7" high horizontal panels of Model 9800 mirror the detailing of this brilliant coastal-region home. The fiberglass surface, shown in Oak, withstands sun and salt air with virtually no maintenance. Available with windload-rated structural reinforcements beginning in 2007.

Mahogany

The view amazes. Almost heaven.

The open grain feel of Model 9800 is sculpted in fiberglass using patented AccuGrain™ technology. Shown here with horizontal panels in Mahogany, it can handle the harshest winters and brutal summers with style. Featuring Double Diamond Radiance windows.

Color and texture
reconnect you
with nature.

This Normandy-inspired home has been reinterpreted for its urban neighborhood. The 8' vertical panels of Model 9800 in Green are a perfect complement.

touch

How does it make you feel?

Even this close, they'll never know it's not genuine hardwood.
Go ahead - touch it. The rich wood graining flows through your
fingertips. In colors recalling the shades of a deep woods trail.

believe

This page, Model 9800 shown in Mahogany.
On the back cover, Model 9800 makes the garage doors a natural part
of the architecture — not an afterthought. The 7' high vertical panels
in Walnut blend seamlessly with this mountain lookout home.

This is the best of both worlds.
Bring on the wind,
rain, driveway
soccer practice, the
years. The surface
of Model 9800
won't warp, crack or
rot like wood. Won't
dent or ding like
steel can.

It begins with safety. Of course.

Made with award-winning safety technology including sealed counterbalance, pinch-resistant door panels and tamper-resistant mounting brackets.

Built for your inner-accountant.

Foamed-in-place R-7.3 insulation helps control costly heat loss and gain. An acoustic break helps block street noise. With 360° weather sealing to stop air infiltration.

Detailing is refined.

Three-section styling on 7' high doors gives a custom design look. Our 8' doors have four-section styling. All panels have finished interiors with color-matched, low-profile hinges.

Beauty borrowed from nature.

Model 9800 uses the Accugrain™ technology of Therma-Tru®, the most respected name in fiberglass doors. You can coordinate the grain and color of your new garage door with a Therma-Tru fiberglass entry door, if you wish.
